

October 11-13, 2016
St. Louis, Missouri

Understanding the Theories and Building Practical Skills

Who Should Attend?

If your company works with hoarder cases, cleans up crime and trauma scenes, decontaminates illicit drug labs, helps control infections agents, or deals with the results of bird and animal infestations, you need to join us in St. Louis on October 11-13.

The conference sold out last year, and we expect another capacity crowd this year.

Bigger and Better

The 2016 conference has been expanded to include:

- Two days of classroom-style presentations, along with a full day dedicated to hands-on practice
- More real-life case studies from practitioners in the industry
- A full session on OSHA bloodborne pathogen requirements, with a separate certificate for attendees that verifies they have met the training requirements for the regulation
- A selected set of vendors with products specifically tailored to forensic restoration
- Interactive presentations that allow participants to learn from instructors and fellow attendees
- A core focus on safety and best practices throughout the three days
- Welcome reception and lunch venues set up to encourage networking

Technical Presentations

**The Really Dirty Job of
Forensic Work**

**Content Cleaning Fol-
lowing an Airplane
Crash**

**The Client's Perspec-
tive**

**Pigeon Poop Several
Feet Thick**

**Hospital Morgue
Clean-up Case Study**

This conference will be bigger and better than last year's, which got spectacular reviews, such as—

“The speakers actually knew what they were talking about!”

In 29 years in the restoration industry this is, hands down, the best conference I've ever been to.

I cannot wait for the next one.”

David Hart
Founder/CEO OzoGen

Day 3 is Hands-On Training

Preference for registration in the hands-on sessions will be given to those attending the technical presentations. Maximum of 40 attendees, so register early. Some of what will be included:

- Respirator fit tests – participants will receive fit test certificate
- Building decon models – 4 variations with features to fit most situations
- PPE demonstration – donning and doffing
- Forensic cleaning – various methods to meet various goals
- Evaluation of work effectiveness – ATP testing and understanding the results

Vendors and sponsors will offer special show pricing for materials used during the sessions. Big ticket items will also be available for purchase.

To Register

Registration is now open for the 2016 Forensic Restoration conference. The conference occurs October 11-13 at the Renaissance St. Louis Airport hotel.

There are a limited number of registrations available and interested individuals are encouraged to sign up early to reserve a place.

<https://restorationindustry.site-ym.com/page/forensics>

Thanks to the generosity of our sponsors, the program registration fee has been kept low to provide an outstanding value.

Early Registration Recommended — space is limited!

The technical presentations on October 11 and 12 are limited to 120 participants.

The hands-on training on October 13 is limited to 40 participants.

One of the First

This will be one of the first venues where participants receive a detailed explanation of the **Guidelines for Professional Forensic Restoration** that has recently been released by RIA.
