

SCRUB MORE AIR SCRUB IT FASTER, SCRUB IT CLEANER!

Think air scrubbers are all alike – just a box, a fan and some filters? They're NOT!

Here's why customers say the Dri-Eaz® HEPA 700 is the BEST choice:

- **Faster job clearance** with the unit's standard filters when industrial hygienists require DOP test compliance
- **Higher Xactimate® rental rates** when 700 CFM is needed
- Larger filters designed to **optimize air filtration** for the toughest restoration environments
- **Quickest ducting and filter changes** with easy, no-tool access
- Engineered, molded and assembled in **Burlington, WA**
- Supported by the **industry's largest network** of US and Canada service centers

BUILT IN USA
WITH GLOBALLY SOURCED MATERIALS

Here's why custom-designed HEPA 700 filters work better:

- **Prefilters** - specially engineered to **balance airflow and HEPA filter protection**
- **HEPA Primary Filter** - removes 99.97% of particulates down to .3 microns with **more durable, high-loading synthetic media**
- **Activated Carbon Filter** - More charcoal pellet surface area to **adsorb more odors and fumes per filter**

Trust your customers' health and your business' liability **ONLY to Dri-Eaz** - the industry's #1 air scrubber manufacturer and filtration experts for 20 years!
